DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a peripheral input device for computer, classified in class 345, subclass 163.
 - II. Claims 7-13, drawn to computer input device support, classified in class 361, subclass 686.
 - III. Claims 14-21, drawn to computer housing support, classified in class 345, subclass 905.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they are separately useable.

In the instant case, subcombination has separate utility such as the invention of group I does not need a plurality of ridges configured to augment a user's grip on the housing and mechanical connector configured to mate with the computer mechanical connector of group II, and does not need use the touch pad and keyboard and the housing of the portable computer having mechanical connector to mate with the computer connector and does not use the handle

portion of the portable computer housing, the pivoting for the first and second housing of the portable computer to operate the mouse. See MPEP § 806.05(d).

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
